

RELAX

FLOOR TO CEILING STANCHION

TOOLS REQUIRED:

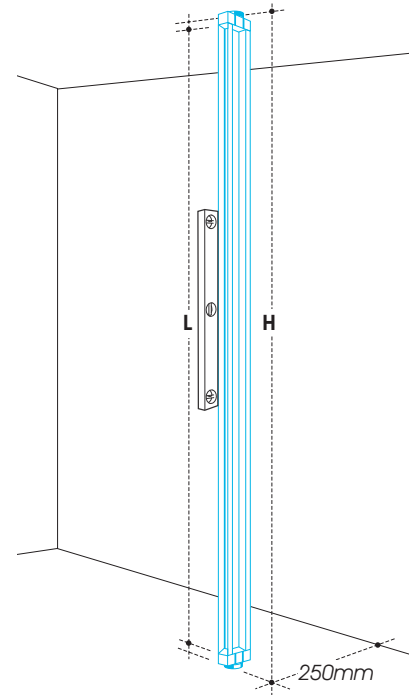

TOP TIP:

* **Fitting to the Stanchions.** When attaching the brackets to the Stanchion ensure the washer which sits within the Stanchion groove is rotated enough for a secure fitting **(3a - 3b)**.

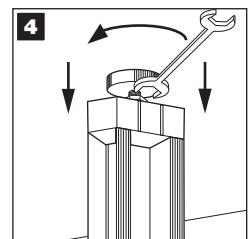

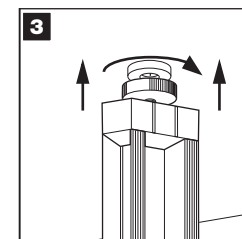

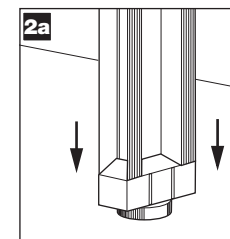

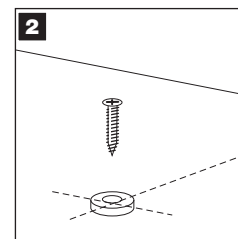

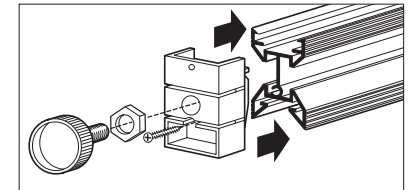

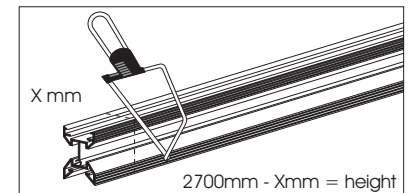

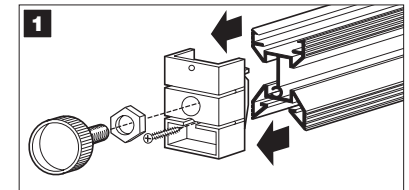

FLOOR TO CEILING STANCHION

SSR-2020-106-AN

$$H - 80\text{mm} = L$$

(ie: $H2560\text{mm} - 80\text{mm} = L2480\text{mm}$)

* **Fitting onto of carpets.** When the system is in use the weight of garments and other items cause the Stanchion to sink into the carpet - at this point the ceiling screw cap **(3 - 4)** needs to be adjusted to ensure a secure fitting.
